

# J. POLEP DISTRIBUTION SERVICES SELECTS VAI FOR ITS ERP NEEDS

S2K software to help J. Polep streamline food distribution and manufacturing operations and increase efficiency and profitability

May 7th, 2012 • Supply & Demand Chain

Ronkonkoma, N.Y.—May 3, 2012 Enterprise Resource Planning (ERP) software provider Vormittag Associates Inc. (VAI) equipped J. Polep Distribution Services with its S2K for Food Enterprise Management software to help the convenience distributor grow and streamline its operations, while increasing efficiency and profitability.

“As a top supplier of a host of products ranging from food and beverages, wine and spirits, tobacco, candy and automotive products, J. Polep needed an advanced solution to successfully

meet its business objectives,” said Joe Scioscia, Vice President of Sales, VAI. “S2K for Food provides a technology solution that’s specifically designed to meet their industry requirements for food distribution and manufacturing and provides the flexibility and enhanced capabilities to meet their future needs.”

With its aggressive growth plans and targeted new acquisitions, J. Polep was looking for a strong and experienced enterprise software partner to help support the unique requirements of the food manufacturing and

distribution industries.

“We selected VAI because of their reputation for outstanding customer support, aggressive product development and experience in the food manufacturing and distribution industries,” said Lori Polep, Vice President and Chief Information Officer, J. Polep Distribution Services. “VAI S2K will give us a complete ERP package and strong support team, which is critical to ensuring our company’s ongoing success.”
